URL	(abbreviation of Uniform Resource Locator) the address of a page on the internet
embed	the inclusion of links, images, videos, and other content into a website

# Year 4 Computing: Web Designers

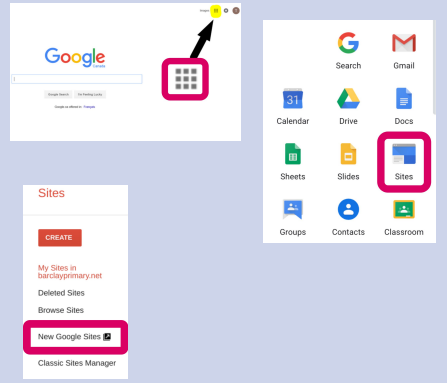

## Key knowledge – What is a webpage layout?

The layouts will be how information is organised and shown on your website. You may want to use a mixture of text and images.

## Key knowledge – How to build a website

Step 1: Select the waffle menu  
 Step 2: Use the drop down menu and select Sites.  
 Step 3: When Google Sites opens we want to select the New Google Sites on the left hand side.  
 Step 4: Create a new site by clicking on the plus symbol at the bottom right of the page.

## Key knowledge - How to embed a video

60

Embedding a video

When the video is embedded it will play right inside the website.

Step 12: We're going to embed a video. From the + button at the bottom right of the page, click on the Video icon.

Step 13: When the video is selected, click on the video you want to use. The video you want, select it and press enter to add the video to the page.

Step 14: The video will now be embedded on your video.
